

Pricing Schedule

Video Digitizing, Editing, Encoding, Streaming Broadcast For On Demand Internet Video

We are firmly committed to enabling anyone to use this extraordinary medium to reach a global audience, we will work to fit your budget, and strive to earn your confidence and business. We do not want to lose the opportunity of working with you because of price. We think if you compare you will find few if any that can match our bandwidth pricing.

This pricing will help provide an answer to that first question that comes to mind “how much will it cost.” In reality there are many options, variables such as audio and video quality, and feature ranges from basic to deluxe, so in most cases we will develop custom pricing for each customer. We focus on quality rather than quantity. As your volume of work or services with us increase your cost will decrease as do ours.

Pricing includes a 15% discount for inclusion of a banner or clip acknowledging us as your production and or streaming provider.

Although it is to complex to provide pricing in this schedule we can program and schedule commercials and interstitials to play during the broadcast. We can enable interactive sessions and provide a means for the viewer to stop the video and check out a sponsor site or even information related to the content in the video. They can also make an immediate purchase of a product or item they see in the video content.

In addition to regular streaming we can provide **Pay Per View** options which include billing and credit card processing, as well as authenticated or restricted access to programming content combined with digital rights management.

No Cost Options: In many cases we can create an agreement to reduce or eliminate all up front costs and take a percentage of the revenue generated. We may choose to act as your sponsor and can also negotiate agreements with other sponsors or advertisers to cover your production and bandwidth costs. In addition to this IPTV.pro another Intelegen Inc. venture will actually be purchasing content and or sharing revenue generated with producers.

We now support High Definition Video and HDTV.

Be Aware: Some video streaming providers offer a very low monthly rate of \$99.00 combined with say 1 GB of transfer. Then charge \$15.00 for an additional 1 GB of transfer. 1.3 GB will be used up by 10 people watching a 1 HR feature @ 300 Kbps.	△
We currently support about 10,000 concurrent viewers, larger distributions over 100,000 viewers require special planning	

We support encoding to these formats: Windows Media, Real Video, QuickTime, Flash FLV, MPEG 2 & 4, 3GPP (cell phones, PDAs)

We support conversion and encoding from the following media, AVI, MPEG, DV, HDV, Mini-DV, 8 MM, VHS, Beta Cam, 1“, Umatic, Digi-Beta, Beta SP, Mini DV, Hi-8, DVC, PAL or Beta PAL format. Formats other than VHS, 8 MM, Mini-DV will have additional costs.

We stream most content using Windows Media 9 because it is most efficient and cost effective and supported by 98% of the desktops. We can broadcast video in the other formats but it is less cost effective.

Shipping costs are pass through and will be added to your invoice, we can also ship back your media using your Fed-x account etc.

There is a separate pricing schedule for Global Live Event Streaming Video Broadcasting & Conferencing which includes video production and streaming on location. We can also set you up to feed the streaming servers with your own equipment.
